

FOR IMMEDIATE RELEASE

BuildForge Exceeds Third Quarter Revenue Plan

Company Sees Significant Gains in Market Momentum and Growth of Marquis Customer List

AUSTIN, Texas – October 27, 2005 – BuildForge, the leading provider of development automation solutions for Real-World Application Lifecycle Management (ALM), today announced the successful achievement of third quarter projected revenues, marking the company's fourth consecutive quarter of rapid growth.

Seven new enterprise customers were added to the BuildForge roster, complemented by several expanded deployments with existing customers. Deals closed this quarter include Fortune 500 companies in the computer hardware, computer software, healthcare, financial, and insurance sectors.

"BuildForge is seeing a notable acceleration in customer demand which is very exciting", said Gregg Burt, president and CEO of BuildForge. "Development teams are recognizing that they can achieve compelling cost savings and quality improvements very quickly through better automation and team collaboration. We're pleased that our solution provides the flexibility, scalability, and rapid implementation time these companies demand".

"One specific trend driving customer urgency is compliance", Burt said. "Engineering management and their teams must provide evidence that their processes are documented, repeatable, and fully auditable from requirements through to production. BuildForge's ability to integrate seamlessly with existing development tools provides a cost-effective, end-to-end solution to satisfy their legislative, regulatory, and internal audit requirements."

About BuildForge

Based in Austin, Texas, BuildForge is the leading provider of development automation solutions for Real-World Application Lifecycle Management. FullControl is the first open framework that allows development teams to automate, track, and analyze their application development lifecycle using the tools they have in place today. BuildForge is used by industry leaders such as Symantec, Avaya, Visa, and Adobe to create significant improvements in productivity, quality, and time-to-market. www.buildforge.com
